

Homes & Villas

A simple preparation guide for your 360° photoshoot

Good preparation makes all the difference.

How well your property is prepared directly affects the quality of the final tour and the time needed for photography.

The time of day is equally important. Different lighting conditions can create very different atmospheres. The best time for your property will be discussed during project planning.

LIVING AREAS & BEDROOMS

- Clear personal items, cables, packaging and everyday clutter from visible surfaces.
- Arrange cushions, throws and furniture neatly; make beds carefully.
- Check that lamps work and replace any visibly mismatched or faulty bulbs.

KITCHEN & BATHROOMS

- Clear dishes, sponges, cleaning products and bins from view.
- Remove personal toiletries; arrange a small selection of attractive items if desired.
- Clean mirrors, glass, taps and reflective surfaces.

OUTDOOR SPACES

- Tidy terraces, garden furniture and pathways; remove hoses and garden tools.
- Prepare pools and outdoor dining areas so they look ready to use.
- Ensure all rooms and outdoor areas to be photographed are accessible.

Please have the property ready before the scheduled shoot. Final details will be confirmed during project planning.
